

Programs for the Chicago Meeting (January, 1999):

Forum 18

Monday, January 25, 1999, 11:15 AM - 12:05 PM

How Should GPC-1 (The HVAC Commissioning Process) Be Modified to Fit a Total Building Commissioning Guide?

Sponsor: TC 09.09, Building Commissioning

APC Liaison: Janet M. Lynch, Johnson Controls, Inc.

Moderator: Karl Stum, P.E., Member, PECEI, Portland, OR

In addition to HVAC systems, owners are now asking to have other building systems commissioned. A total building commissioning guide is currently being developed under which each of the respective disciplines will be responsible to develop their own guide. ASHRAE will be providing the submission for HVAC commissioning. How should GPC-1 be modified? Should the scope or process change to allow players for other fields? Who coordinates it all? What shouldn't we allow to change to fit into the uniform format?

Public Session

Monday, January 25, 3-5 PM

Designing, Installing or Operating Engineers -- Who Will Most Impact New Millennium Facilities?

Sponsor: TC 01.07, Operation and Maintenance Management; TC 01.04, Control Theory and Application; TC 04.11, Smart Building Systems, TC 9.9 Building Commissioning, ASHRAE Program Committee

Moderator: Jim Gartner, Member, Shaw ALMEX Fusion Systems, Cincinnati, OH

How will engineers, contractors and owners respond to environmental challenges and productivity issues in the new millennium? Panelists from ASHRAE, AIA, BOMA, ARI, IFMA, NIBS, AFE and NAIMA share their opinions on who most will determine the economics, comfort, IAQ, energy use and productivity in facilities.
