

## **Programs for the Minneapolis Meeting (June, 2000):**

### **Forum 5**

Sunday, June 25, 2000, 10:15-11:05 AM

#### **Experiences and Results of One-Pass, Re-Commissioning and Continuous Commissioning With and Without Monitoring**

*Sponsor: TC 09.09 Building Commissioning*

*APC Liaison: Ira G. Poston, Duke Power Company*

*Moderator: Charles Culp, Ph.D., Member, Texas A&M University, College Station, TX*

Commissioning is the engineering activity of assuring the complete system performs to provide efficient comfort to occupants. Some experience indicates that the efficiency reduces over a couple of years if the building is not properly monitored. This forum discusses real experiences and looks to establish potential program and research areas.

#### **What Constitutes Design Intent?**

*Sponsor: TC 09.09 Building Commissioning*

*APC Liaison: Robert J. Linder, Owens Services Corp.*

*Moderator: Karl Stum, P.E., Member, PECEI, Portland, OR*

Design intent is becoming a standard requirement in many commissioning projects. However, what constitutes design intent is not well understood by the design community. Level of needed detail, components and issues included, when it should be developed or updated, who should write it, who should approve it and whether it should be included in contract documents are issues that need clarification among practitioners.
